ABOUT ME

I am a Full Stack Web
Developer and Machine
Learning enthusiast

Hello! I'm Harshit Adhikari, a passionate learner currently pursuing a bachelor's degree in computer science. I have a knack for merging web development and machine learning to create innovative solutions.

My journey has been enriched by practical projects in both frontend and backend development, along with valuable internship experience at a startup, where I honed my skills as a frontend developer.

I thrive on continuous improvement and enjoy taking on new challenges. I'm currently seeking opportunities where I can apply my skills, learn, and grow. If you have an exciting opportunity that aligns with my background, I'd love to hear from you!

[More about me](#)

FEATURED PROJECTS

Here are some of the selected projects that showcase my passion for Front-end Development and Machine Learning.

WilsonPort Transport Site

I developed and deployed a website for WilsonPort, a transportation company, to enhance its online presence and provide a platform for customers to learn about the

company's services and offerings.

The website is designed to be responsive, ensuring optimal viewing and interaction experience across a wide range of devices. The technologies I used include **HTML**, **CSS** and **Javascript**.

Potato Disease Classification

This project aimed to create a model that detects whether a potato leaf contains any disease.

I used machine learning to accurately detect different diseases that affect potatoes, and **HTML**, **CSS**, **JavaScript** and **FastAPI** for creating a website where users can upload a photo and determine if the leaf contains a disease or not.
